THE POULTRY HOUSEKEEPER

EFFICIENT LITTER MANAGEMENT FOR LESS \$

More and more poultry growers are discovering how easy and inexpensive it is to maintain a broiler or turkey house with one machine that practically anyone can operate. The Poultry Housekeeper removes feathers and caked or wet litter in less time than you ever dreamed possible.

Remaining litter is quickly aerated to reduce ammonia fumes and drying time.

Litter removed from the house can either be stockpiled or spread, while new litter may be loaded and distributed inside the house. The simple one-man operation of the Housekeeper makes it the cost-effective solution to litter management for today's poultry industry.
